## SKILLS

| | |
|---|---|
| Languages: | C++, C, JavaScript, Java, Python |
| Frameworks/Libraries: | HTML and CSS, Node.js, React |
| Tools/Platforms: | Git & Github, MongoDB, Microsoft Excel |
| Soft Skills: | Leadership, Teamwork, Problem Solving, Adaptability. |

## Projects

ConnectIN / Github — Oct' 25 – Jan' 26

- Designed a LinkedIn-style alumni networking app with authentication, profiles, posts (images/videos) real-time chat/notifications, mentorship matching, and basic analytics using **Socket.IO**.
- Implemented **Vanilla JavaScript** to fetch live weather data, manage user inputs, process JSON responses and dynamically update UI elements via **DOM manipulation**.
- Developed mentorship matching features for connecting mentors and mentees
- Implemented analytics such as profile views and post impressions with **Cloudinary** media storage.
- **Tech Stack used:** Client: **React + Vite + Tailwind**, Server: **Node.js + Express + MongoDB.**

Health Care International – Online Doctor Recommendation System / Github — Jan' 25 - April' 25

- Developed a full-stack online doctor consultation and health recommendation platform designed to promote better physical and mental wellness.
- **AI-powered** health recommendations using **Gemini API**
- Online doctor consultation form with interactive, responsive UI for accessibility
- Frontend built with clean layouts, modern **CSS,** and **JavaScript** interactivity and Backend-based processing using **PHP.**
- **Tech Stack used: Html, CSS, JS, PHP, Gemini API**

Weather App / Github — Jun' 25 - Oct' 25

- Developed a fully functional, responsive Weather Application that retrieves and displays real-time weather data for any city using the OpenWeatherMap service.
- Implemented dynamic data fetching and UI updates using **Vanilla JavaScript**, handling user input, **JSON parsing**, and **DOM manipulation** efficiently.
- Built asynchronous workflows using **Fetch API**, **Promises**, and **RESTful** calls to ensure seamless real-time data integration.
- Designed robust error handling to gracefully manage invalid city inputs, network issues, and API failures, improving user experience.
- **Tech Stack: HTML, CSS, Vanilla JS, Fetch API, OpenWeatherMap Rest API.**

## TRAINING

Data Structures & Algorithms - Self-Paced (C++) / Cipher School — Jun' 25 - Jul' 25

- Gained a strong understanding of core data structures including arrays, linked lists, stacks, queues, **hash tables**, and **dynamic programming concepts.**
- Implemented various DSA concepts using C++, with a focus on **trees**, **graphs** and **time & space complexity** (Big-O-analysis)
- Solved multiple practice problems and mini-assignments, strengthening problem-solving ability, logical reasoning, and algorithmic thinking.

## CERTIFICATES

- Privacy and Security in Online Social Media / NPTEL — Jan' 25 - Apr' 25
- Unrevealing basic **Python** towards **AI/ML** (live) / CSE Pathshala — Feb' 24 - Mar' 24

## ACHIEVEMENTS

- Participated in Binary Blitz Hackathon, collaborating in a team to develop innovative solutions under strict time constraints. — Mar' 24
- Participated in Hackermania Hackathon, applying problem-solving and teamwork skills to build a functional prototype in a competitive environment. — Mar' 24

## EDUCATION

- Lovely Professional University — Punjab, India
  BTech - Computer Science & Engineering; CGPA: 7.07 — Since Aug' 23 - Present
- Kendriya Vidyalaya No.1 — Gandhi Nagar, Jammu
  12th ; Percentage: 71% — Apr' 21 - Mar' 22
- Kendriya Vidyalaya No.1 — Gandhi Nagar, Jammu
  10th ; Percentage: 85% — Apr' 19 - Mar' 20
